Traceflow

PROJECT MANAGEMENT · ISSUE TRACKING · DEVELOPMENT INSIGHTS

From issue to insight.

Two connected paths represent issues moving through a workflow. Where the paths meet, a shared node stands for collaboration, traceability and tool integrations.

Starting design concept: not trademark-cleared or production-vetted.

01 Logo

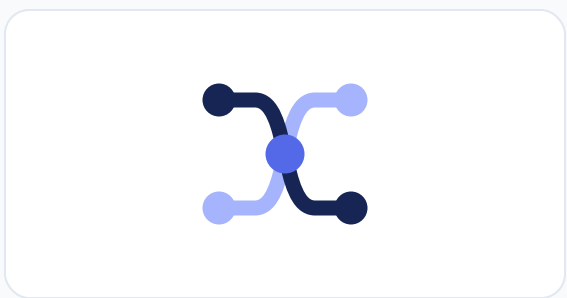
Primary logo · light backgrounds
Icon left, wordmark right. Header, login, docs, marketing.

Primary logo · dark backgrounds
Wordmark in Cloud, node lifted to #7C8EF5 for contrast.

02 Icons

App icon
512 × 512 PNG

Favicon
Shown at 96, 32, 16 px



Icon-only mark
Sidebar and compact header. Light and dark.

In the interface use one consistent Lucide set (Dashboard, Issues, Projects, Board, Analytics, GitHub, Automations).
Keep the custom mark for brand identity only; do not replace UI icons with it.

03 Color

Midnight Navy
#172554
RGB 23, 37, 84
Logo, sidebar, strong headings

Brand Indigo
#5369E8
RGB 83, 105, 232

04 Typography and usage

Wordmark: Inter SemiBold, outlined in the SVGs (no font install needed).
Application UI: Inter, consistent sizes and spacing. Flat vector, no gradients.
Buttons and cards: modest rounded corners, subtle borders.

Clear space and size
Keep clear space of at least the height of the letter T on all sides.
Primary logo: 120 px wide minimum. Below 24 px use the favicon.
Do not recolor, stretch, rotate, outline or add shadows to the logo.
Use the dark variants on dark surfaces; never place navy on navy.
